

### Central Mesic Tallgrass Prairie (HRP)

The Central Mesic Tallgrass Prairie (HRP) map class represents the Central Mesic Tallgrass Prairie plant community (CEGL002203). At EFMO, this community exists on uplands that were previously grazed pasturelands. The park has planted and managed through prescribed burning several hectares of prairie in the North and South Units. These prairies are mesic grasslands consisting of big bluestem, Indiangrass, and a variety of forbs.
